PRODUCT BULLETIN
2005-01

PRODUCT IMPACT:

Any product with RTV Sealant

DATE:

August 26, 2005

PART NUMBER SERIES:

Any PGA, DIP, or SIP Socket with RTV suffix in P/N

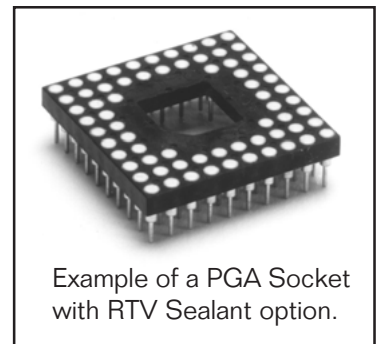

TYPE:

Discontinuation

Effective immediately, the RTV Sealant option has been discontinued on all standard products. RTV silicone sealant was available as an option on most standard PGA, DIP and SIP Sockets.

Any existing stock of sockets with RTV sealant is still valid and usable.

For customers with harsh environment applications, we are recommending the use of our Tape Sealant (indicated by adding 3M to the end of the part number). Our Tape Sealant is removable and offers all the same benefits as RTV - protecting sockets (and contacts) from dirt and other contaminants during processing and/or storage.

Example of a PGA Socket with RTV Sealant option.
