PRODUCT BULLETIN
2007-02

PRODUCT IMPACT:

.050/(1.27mm) Pitch Single Row Board to Board Connector

DATE:

September 27, 2007

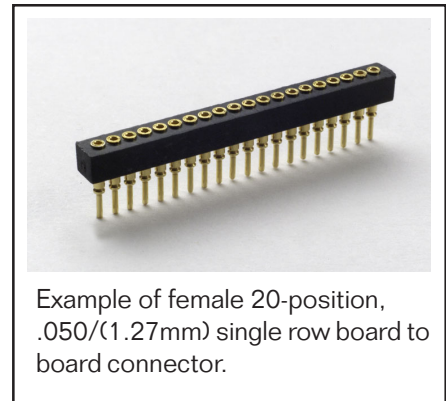

PART NUMBER SERIES:

RSDS

TYPE:

Material Change

Effective immediately, the insulator material used for our molded female, single row .050/(1.27mm) pitch Board to Board Connectors, will be changed from LCP to FR-4. This change affects body type RSDS (molded LCP). Note: RSDS replaced the older body types SDS (molded PBT) and HSDS (molded PPS). The new FR-4 body type designator is **FSDS**. The new FR-4 female connectors (FSDS series) will be offered with only Gold/Gold (GG) terminal/contact plating.

Example of female 20-position, .050/(1.27mm) single row board to board connector.

Existing Inventory

Any existing inventory of RSDS parts (as well as the older SDS and HSDS products) are still usable in appropriate applications based on their insulator material and terminal/contact plating.

Other Options

Female, single row .050/(1.27mm) pitch Board to Board Connectors are also available in Peel-A-Way® Removable Terminal Carriers (body type KBS).

For any customers who continue to require a molded option and can commit to volume orders, please contact the customer service representative assigned to your region for product availability on a custom basis.
