Where Research Becomes Reality . . . Worldwide

March 2010

Advanced Interconnections Corp. PFOS Statement

Advanced Interconnections Corp. (AIC) does not use PFOS (Perflouroctane Sulfonate or Perfluorooctanesulfonic Acid) in any of our products or materials.

We have researched the use of these substances and checked components and process areas where they might be used within our company. These were materials produced by 3M and voluntarily phased out beginning in 2001.
